**Re: American Recovery and Reinvestment Act - Buy American Section 1605**

The American Recovery and Reinvestment Act of 2009 has been signed into law. Section 1605 mandates use of American iron, steel and manufactured goods wherein funds appropriated by this Act are used for construction, alteration, maintenance or repair of a public building or public work.

Flow Safe Supply, Inc., a privately held United States based company, has always had and will continue to have the capability of providing a domestically produced product supporting United States owned and United States based iron and steel mills and manufactured components. Products supplied by Flow Safe Supply for projects being funded by monies from the American Recovery and Investment Act and subject to clause 1605 are manufactured and assembled at our one and only production facility located in Orchard Park, NY, USA.
